

PROVIDER ALERT

Cultural DASH Web Platform

April 15, 2019

Optum Idaho is excited to announce to our Provider network the launch of a new, innovative web platform designed to offer information, skills, and resources regarding the delivery of culturally sensitive care and support for Members and their communities. DASH emphasizes four key elements of culturally compassionate practice: Diversity, Awareness, Sensitivity, and Humility. You can find this on the home page of the Optum Idaho website, optumidaho.com.

It is our hope that this resource will support you, as Providers, to continue to deliver services that meet the needs of our individual Members by recognizing and appreciating their diverse cultures and personal experiences.

This platform will continue to grow to offer information and resources for specific populations that you serve throughout the state. Thank you for your work with all of Members and we hope this new DASH platform is useful, informative, and builds upon your work to creatively and sensitively care for our Members.

Should you have any questions, please contact your Optum Regional Network Manager.

Thank you,

The Optum Idaho team
